

MAINTAINING AND REPAIRING CITY ROADS

TYPES OF ROAD DEFECTS COMMON TO OUR REGION

Pothole

✓ **WINTER REPAIR**
Potholes are filled with a cold mix asphalt as a temporary solution.

✓ **SUMMER REPAIR**
Potholes are repaired using hot mix asphalt once the plants open.

Alligator Cracking

✗ **WINTER REPAIR**
Alligator cracking on the asphalt surface cannot be repaired with a cold mix.

✓ **SUMMER REPAIR**
Areas with alligator cracking are repaired using hot mix asphalt once the plants open.

Delamination

✗ **WINTER REPAIR**
Delamination of the asphalt surface cannot be repaired with a cold mix.

✓ **SUMMER REPAIR**
Areas with delamination are repaired with sand seal asphalt when temperatures are 15C or above.

Seam Separation

✗ **WINTER REPAIR**
Seam separation on the asphalt surface cannot be repaired with a cold mix.

✓ **FALL REPAIR**
Areas with seam separation are addressed through crack sealing in early fall.

Did you know? During the winter months, when City crews are not plowing snow, there are up to four crews out on any given day patching potholes.
