

ADDENDUM

PROJECT TITLE: Plowing of City Routes	ADD. NO: 1
RFP NO: 2022-084301P	DATE: September 15, 2022
PAGE 1 of 2 (Including Confirmation Sheet)	

Make the following modifications to the above project. Include in the amount of the Proposal, any additions to or deductions from the cost of the work by reason of these instructions.

Sign and attach this Addendum to the Proposal documents and submit with your Proposal. Failure to do so may result in the rejection of your Proposal.

Item No. 1 – Questions and Answers

Q1. It appears that the plowing is to be paid by hourly rates , and is to be inclusive of deicing materials. Do you have a spec for application rates, or a historical volume of salt used per route per storm?

A1. Our “standard” application rate is 125 kg of salt per 1 kilometre and 250 kg of sand per 1 kilometre. We don ’t have historical salt use related to specific routes.

Q2. How many plow units are required for the routes to be plowed in a timely matter? ie: During a storm, is it expected that there will be one vehicle on each route ?

A2. The City has generally used 1 plow unit (vehicle) per route to pursue the plowing standards defined in the RFP, so it would be reasonable to assume a contractor would need 1 plow unit (vehicle) per route. Proponents are welcome to propose different options.

Item No. 2 – General

Please note that on the City’s website, there is an error in the email address provided for inquiries. It should read “supplychainmanagement@saintjohn.ca”.
